— WHAT IS PRIVIQ?

One platform. Every risk domain.

Leveraging ChatGPT 4o1, PrivIQ automates risk assessments, policies and compliance checklists — every AI output validated by qualified risk professionals before use.

 <p>AI-Generated Content</p> <p>ChatGPT 4o1 creates risk assessments, policies and checklists in seconds.</p>	 <p>Human Verification</p> <p>Every AI output is validated by qualified risk professionals before use.</p>	 <p>Unlimited Registers</p> <p>No caps on registers or assessments — scale freely as your business grows.</p>
---	--	---

— THE PRODUCT SUITE

Four core modules.

<p>01 Policies & Documents</p> <p>Generate or upload policies, distribute to stakeholders, and track review and acknowledgment with full audit reporting and automated reminders.</p>	<p>02 Risk Assessments</p> <p>AI-generated qualitative RAs and quantitative threat analyses with severity, likelihood and pre/post-mitigation scoring. Full history and version control.</p>
<p>03 Risk Registers</p> <p>Build unlimited, fully customisable registers across every domain — linked to controls, checklists and assessments.</p>	<p>04 Controls & Checklists</p> <p>Prompt-based generation of compliance checklists and risk controls — editable, verifiable, with status tracking and overdue reminders.</p>

— MEASURABLE ROI

Compliance that pays for itself.

<p>30% Lower compliance-management costs through streamlined workflows and automation.</p>	<p>Weeks faster Faster readiness for audits and regulatory reviews — preparation cut by weeks.</p>
<p>Fewer fines Reduced exposure to penalties via continuous compliance monitoring and oversight.</p>	<p>Zero breaches Fewer data-handling errors thanks to structured DSAR, DPIA and risk-assessment tools.</p>

— CAPABILITIES

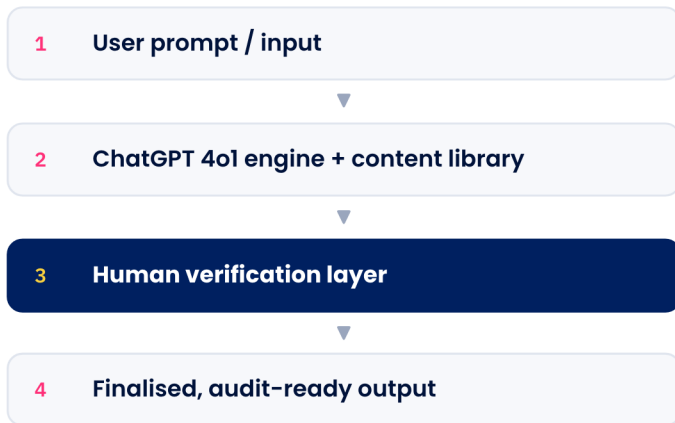

Beyond risk registers.

A complete toolkit for modern privacy and risk teams — from data subject requests to AI governance.

 <p>DSAR Management</p> <p>Track and fulfil Data Subject Access Requests with deadlines, workflow and audit trail.</p>	 <p>DPIA & Assessments</p> <p>Guided Data Protection Impact Assessments with scoring and mitigation tracking.</p>	 <p>Data Mapping</p> <p>Visualise data flows across your organisation and surface where personal data lives.</p>
 <p>Vendor Risk</p> <p>Assess and monitor third-party and supplier risk with DPAs and recurring reviews.</p>	 <p>AI Governance</p> <p>Govern AI systems with the NIST AI RMF — inventory, risk and accountability controls.</p>	 <p>CS3D Compliance</p> <p>Corporate Sustainability Due Diligence across human-rights and environmental supply-chain risk.</p>

— AI ARCHITECTURE

How it works.

— OUTPUTS GENERATED

Risk Assessment	Policy Document
Compliance Checklist	Risk Register
Control Matrix	DPIA Report

— SUPPORTED FRAMEWORKS

POPIA	GDPR	CCPA	ISO 27001
NIST CSF	NIST AI RMF	King IV	
PCI-DSS	SOC 2	CS3D	

★ **Built for every risk domain.** Data Privacy · GRC · HSSE · Operational · EIA · Cyber-Security — the only limit is your imagination.

— WHY PRIVIQ

Four key advantages.

Tailored & Scalable

Bespoke risk solutions clients build themselves — SMB to Enterprise. No lock-in, no minimum configurations.

AI-Integrated

ChatGPT 4o1 drives content generation, with mandatory human verification at every step.

Multi-Lingual · Multi-Regulation

Global coverage with local fit — POPIA, GDPR, CCPA, LGPD, ISO 27001 and more.

Price / Performance

Unlimited registers and assessments. No per-register or per-user limits, no hidden costs.

— TRUSTED ACROSS REGULATED SECTORS
